

## Arrestor Bed – A38 Menheniot

### Project details:

A vehicle arrestor was installed to improve safety on the A38 at the junction for Menheniot and Widegates between Plymouth and Bodmin.

Using Lytag<sup>®</sup> lightweight aggregate to construct a vehicle arrestor, a specially prepared bed of un-compactable material, designed to decelerate wheeled vehicles at a controlled rate and bring them to a halt, minimising danger to the occupants or damage to the fabric.

### Project:

A38 Menheniot, Central reservation arrestor

### Date:

January 2008
