

Screed – Chelsea FC, Training Academy

Project details:

This state-of-the-art training ground is where Chelsea's main training activities take place. The facility has taken two years to build, and is designed to unify all football activities at Chelsea in a 'campus' style.

The unique three storey training facility features the latest in training, rehabilitation, medical, pitch and media technology. Its design which incorporates a sedum roof has achieved a "BREEAM excellent" rating. Lytag® lightweight aggregate no fines screeds were used in the shower and changing facilities within the complex.
