

Screed – Milton Park, Oxford

Project details:

Milton Park buildings are state-of-the-art located on Milton Park; the UK's largest mixed-use business and Science Park. The Centre provides companies with office space close to Didcot and Oxford

Lyttag[®] lightweight aggregate was used in no-fines lightweight screeds to minimise weight and improve the thermal insulation properties.

The Park received the 2008 BCO Regional Winner award for Commercial Workspace South of England (outside M25) and South Wales.
